

Every word on the site, ready for your red pen.

The complete copy of the OrbisMoneta website, extracted from the approved design build and laid out page by page — so it can be read, corrected and signed off before development continues.

DOCUMENT

Website Content Document

Full copy deck for review & sign-off

PREPARED FOR

OrbisMoneta

A brand of Monetanova Technologies Pvt. Ltd.

SCOPE

10 sections · 220 content blocks

Home, Services, Products, Industries, Lab, Partners, About, Insights, Contact

STATUS

Draft 1 — awaiting client review

15 items flagged for input

Mark up freely — the right-hand column of every table is yours

Content transcribed verbatim from the current website build. Text set inside illustrations and infographics is listed separately, as amending it requires the artwork to be re-cut.

Confidential — prepared for OrbisMoneta. © 2026 Monetanova Technologies Pvt. Ltd.

How to use this document

Everything on the website is broken into numbered content blocks. Read down the “Content as currently built” column, and write your changes in the “Client revisions” column beside it.

10

SECTIONS

220

CONTENT BLOCKS

3,314

WORDS OF COPY

15

ITEMS NEEDING INPUT

- 1

Every block has a reference

Each row carries a code such as `S-04` or `P-12`. Quote that code in emails or calls and we will know exactly which line you mean — no screenshots needed.
- 2

Write in the right-hand column

The pale “Client revisions” column is deliberately blank. Write, type or comment there. Anything left blank we will treat as approved as written.
- 3

Amber rows need a decision

Rows marked **Action / note** are questions for you, or content still outstanding. These are the items that hold up build, so please answer these first.
- 4

Text inside graphics is listed too

Where copy sits inside an infographic it is labelled as such. It can still be changed, but the artwork has to be redrawn — so flag those early.
- 5

Element labels tell you the role

Headline, Body copy, Button and so on describe how each piece of text is used on screen. Keeping to a similar length preserves the layout.
- 6

Return it however suits you

Annotate this PDF, print and scan it, or reply with a list of reference codes and replacement text. All three work equally well for us.

Contents

PAGE	SECTION	REFS	WHAT IT COVERS
SITE-WIDE	Global Elements	G-01...	Copy that appears on every page — browser metadata, main navigation, the capability ticker and the footer. Changes here apply across the entire site.

Why OrbisMoneta

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
H-24	Eyebrow	Why OrbisMoneta	
H-25	Headline (H2)	Where product engineering meets financial expertise.	
H-26	Introduction	OrbisMoneta was built to bridge the gap that most institutions face — between the ambition to modernize and the specialist capability to execute. We combine deep financial domain knowledge, engineering discipline and product-building experience into a single, accountable engagement model.	
H-27	Point 01	Product & Engineering, Not Just Advisory — We build and ship — proprietary software, custom engineering solutions and hosted platforms — not just strategies and roadmaps.	
H-28	Point 02	Full Spectrum of Financial Technology — Enterprise payments, digital money, AI, fraud risk, open finance and cloud-native platforms — deep expertise across the entire modern financial stack.	
H-29	Point 03	From Boardroom to Production — We carry engagements from strategy and architecture through to live deployment — with a single team accountable for the outcome.	
H-30	Point 04	Regulator & Institution Grade — Everything we design and build meets the compliance, governance and explainability standards that central banks, regulators and supervisory bodies require.	

Highlight cards

Three cards on the right of the “Why” section.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
H-31	Card 1 — Delivery Model	Software + Engineering + Advisory — Three capabilities, one integrated team — eliminating the gaps between strategy, build and operations that derail most modernization programmes.	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
H-32	Card 2 — Coverage	Payments · Digital Money · AI · Risk — The four forces reshaping financial services infrastructure — available under one roof, delivered by practitioners who have built in each domain.	
H-33	Card 3 — Principle	Independent. Accountable. Outcome-Led. — No platform allegiances, no vendor quotas. Every recommendation and every line of code is measured against client outcomes, not commercial incentives.	

Strategic Advisory & Engineering Services

The services offer: positioning statement, six service lines with focus areas, delivery approach and a closing call to action.

Industries & Engagement Model

The five client segments served, each with capability tags, followed by the four-phase engagement model.

Section introduction

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
I-01	Eyebrow	Industries	
I-02	Headline (H2)	Built for every institution shaping the future of money.	
I-03	Introduction	We work across the full spectrum of the financial ecosystem — from global banks to digital-native fintechs and financial market infrastructure operators.	

Industry segments

Five cards, each with an icon, a title, a description and capability tags.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
I-04	Segment 1 — title	Banks & Financial Institutions	
I-05	Segment 1 — description	Retail, commercial, corporate and investment banks modernizing payment infrastructure, launching digital money capabilities and deploying AI-powered risk management.	
I-06	Segment 1 — tags	Enterprise Payments · ISO 20022 · Digital Money · Fraud AI · API Banking	
I-07	Segment 2 — title	Fintechs & Digital Banks	
I-08	Segment 2 — description	Agile financial services companies needing specialist infrastructure — payments access, regulated digital asset capabilities, scalable risk architecture and cloud-native platform engineering.	
I-09	Segment 2 — tags	Product Strategy · Cloud Native · API Banking · Risk & Compliance	
I-10	Segment 3 — title	Corporates & Treasuries	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
I-11	Segment 3 — description	Multi-national corporates and treasury teams seeking to optimize cross-border payments, integrate with open finance ecosystems and leverage programmable money for supply chain and trade finance.	
I-12	Segment 3 — tags	Cross-Border · Treasury Payments · Open Finance · Tokenization	
I-13	Segment 4 — title	Governments & Regulators	
I-14	Segment 4 — description	Government agencies and supervisory authorities building national payment systems, CBDC policy frameworks and regulatory oversight capabilities for the digital financial system.	
I-15	Segment 4 — tags	CBDC Policy · National Payment Systems · Regulatory Sandbox · FMI	
I-16	Segment 5 — title	Financial Market Infrastructure	
I-17	Segment 5 — description	Payment system operators, clearing houses, CSDs and exchanges modernizing clearing and settlement infrastructure, adopting ISO 20022 and connecting to digital asset and CBDC ecosystems.	
I-18	Segment 5 — tags	Clearing & Settlement · ISO 20022 · Digital Assets · Interoperability	
ACTION / NOTE The five segment cards currently use emoji icons (🏠 ⚡ 🏢 📄 🩹). We recommend replacing these with custom brand icons before launch.			

Engagement model

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
I-19	Eyebrow	Engagement Model	
I-20	Headline (H2)	How we work with you.	
I-21	Introduction	A structured four-phase engagement model — bringing strategy, architecture, engineering and operational expertise to bear as a single, accountable team.	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
I-22	Phase 01 — Discover & Define	We assess your current state, technology estate, regulatory context and strategic objectives — and define a clear, honest picture of what modernization will deliver and require.	
I-23	Phase 02 — Design & Architect	We produce a target architecture, product specification and transformation roadmap — grounded in what works at financial infrastructure scale and shaped for your specific regulatory environment.	
I-24	Phase 03 — Build & Deliver	Engineering and product pods move from approved design to production — shipping software, integrating systems and embedding the controls and governance your institution demands.	
I-25	Phase 04 — Operate & Evolve	Ongoing platform operation, performance optimization and strategic support — because financial infrastructure is never truly complete, and neither is our commitment to your outcomes.	

OrbisMoneta Lab

The innovation lab — currently a placeholder section awaiting content and imagery.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
L-01	Eyebrow	OrbisMoneta Lab	
L-02	Headline (H2)	Where we prototype the next generation of financial infrastructure.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-08	Leadership summary	Founded and led by a payments and financial technology executive with nearly three decades of experience delivering mission-critical payment infrastructure, enterprise products, and modernization programs across global financial institutions, technology companies, and regulated banks.	

The story

Four narrative blocks.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-09	Why OrbisMoneta Exists	The financial industry is entering the most significant transformation since the introduction of electronic payments. Digital currencies, tokenized assets, artificial intelligence, real-time payments, programmable finance, and cloud-native infrastructure are fundamentally reshaping how value moves across the global economy. Yet many institutions remain constrained by legacy technology, fragmented architectures, and increasingly complex regulatory obligations. OrbisMoneta was established to bridge this gap — combining strategic advisory, enterprise software, and engineering expertise to help financial institutions modernize with confidence while preparing for the future of money.	
A-10	What We Do	We advise, design, build, and operate enterprise-grade financial technology platforms that enable institutions to modernize payment infrastructure, adopt digital assets, integrate AI into financial operations, and accelerate innovation without compromising resilience, security, or regulatory compliance. Our capabilities span strategy, architecture, software engineering, cloud platforms, systems integration, managed services, and proprietary products — providing clients with a single trusted partner throughout their transformation journey.	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-11	Why Institutions Choose OrbisMoneta	Our approach is built upon practical experience rather than theoretical consulting. Unlike traditional advisory firms or pure software vendors, OrbisMoneta combines strategic thinking with product engineering and implementation expertise. Clients choose us because we understand how financial infrastructure operates inside banks, payment networks, fintechs, and regulated institutions — and because we have successfully delivered mission-critical payment systems at enterprise scale.	
A-12	Our Vision	To become one of the world's most trusted financial infrastructure companies, powering the next generation of payments, digital assets, and intelligent financial ecosystems.	

Innovation philosophy

Presented as a pull-quote.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-13	Kicker	Innovation Philosophy	
A-14	Quote	True innovation is not about adopting the latest technology—it is about solving tomorrow's financial challenges before they become today's business problems. Every product we build begins with understanding how financial markets are evolving, where institutions are heading, and what capabilities they will need to succeed in the future.	

Leadership & payment experience

Rotating slideshow — four slides.

Leadership team

Sub-page of About.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-20	Eyebrow	Leadership Team	
A-21	Sub-heading (H3)	The People Building OrbisMoneta	
A-22	Introduction	A senior team of financial infrastructure practitioners, product leaders and engineers guiding OrbisMoneta's strategy, platforms and client engagements.	
A-23	Profile 1 — name	Sanjay Bhoite	
A-24	Profile 1 — role	Chief Executive Officer & Chief Product Strategist	
A-25	Profile 1 — biography	Sanjay Bhoite is a financial infrastructure strategist and product innovation leader with nearly 30 years of global experience in payments and financial technology. Having partnered with 75+ banks, financial institutions, central banks, and national payment organizations, he specializes in payment modernization, digital currencies, tokenization, AI-driven financial services, and enterprise financial platforms. At OrbisMoneta, he is shaping the next generation of financial infrastructure by transforming emerging industry trends into secure, scalable, and future-ready products for financial institutions worldwide.	
A-26	Profiles 2 & 3 — placeholder	Additional Leadership Profile — Profile coming soon	
ACTION / NOTE Client instruction from the brief: "Co-founder's profile yet to be received." — please supply name, role, photograph and biography (≈ 90 words, matching the format above) for each additional leader. The layout supports up to five profiles.			

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
ACTION / NOTE		Profile photographs are outstanding. The CEO card currently shows initials ("SB") in place of a photograph.	

Credentials strip

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-27	Metric 1	Global — Countries Served	
A-28	Metric 2	Payments · AI · Digital Assets — Enterprise Platforms	
A-29	Metric 3	Advisory + Products + Engineering — Delivery Model	

Area of expertise

Scrolling strip of twelve capability areas.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
A-30	Heading (H4)	Area of Expertise	
A-31	Expertise areas	- Enterprise Payment Hubs & Payment Modernization - Financial Market Infrastructure (FMI) - Cross-Border Payments - CBDCs & Digital Currency Infrastructure - Stablecoins & Programmable Money - Asset Tokenization & Digital Asset Platforms - ISO 20022 Transformation & Payment Interoperability - AI for Financial Services & Intelligent Automation - Enterprise Product Strategy & Innovation - Cloud-Native Financial Platforms - Financial Crime, Fraud & Risk Management - API Banking & Open Finance	

Careers — to be created

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
		ACTION / NOTE Client instruction from the brief: "Career page to be added on the About." — no careers content exists yet. To build this we need: an employer positioning statement (≈ 60 words), 3–4 cultural principles, current open roles (title, location, type, description) and the application email or applicant-tracking link. The "Career" navigation item currently points to the Contact section.	

Insights

The thought-leadership index. Nine article titles are in place; the articles themselves are still to be written.

Section introduction

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
N-01	Eyebrow	Insights	
N-02	Headline (H2)	Perspectives on the future of money.	
N-03	Introduction	Research, analysis and field notes from practitioners engineering financial infrastructure — covering digital money, payments, AI, risk and the evolving regulatory landscape.	
N-04	Filter categories	- All - CBDCs & Digital Money - Stablecoins - Enterprise Payments - Cross-Border - AI & Risk - Digital Assets - ISO 20022 - Open Finance	

Article index

Nine cards. Each shows a category, a headline and a topic tag.

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
N-05	Article 1 — CBDCs & Digital Money	Designing Retail CBDC for Privacy: The Architecture Central Banks Need to Get Right · tag: Digital Money	
N-06	Article 2 — Enterprise Payments	Why Instant Payments Demand a New Approach to Fraud — The Case for AI-Native Risk · tag: Fraud & Risk	
N-07	Article 3 — ISO 20022	Beyond Compliance: Extracting Real Commercial Value from ISO 20022 Data Richness · tag: Enterprise Payments	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
N-08	Article 4 — Stablecoins	Stablecoin Regulation in 2025: What Issuers, Banks and Payment Operators Must Do Now · tag: Digital Assets	
N-09	Article 5 — Cross-Border	The End of Correspondent Banking As We Know It: What Replaces It and When · tag: Cross-Border	
N-10	Article 6 — AI & Risk	Explainable AI in Financial Services: Building Models That Regulators Will Accept · tag: AI & Governance	
N-11	Article 7 — Open Finance	Open Finance Beyond Open Banking: Building the API Ecosystem for the Next Decade · tag: API Banking	
N-12	Article 8 — CBDCs & Digital Money	Wholesale CBDC and the Quiet Revolution in Interbank Settlement · tag: Financial Market Infrastructure	
N-13	Article 9 — Digital Assets	Tokenizing Real-World Assets: The Institutional Roadmap for Banks and Asset Managers · tag: Digital Assets	
N-14	Button	View All Insights →	
ACTION / NOTE Client instruction from the brief: each card is to show an image on the left with the headline on the right, and clicking through opens the full article on its own page. The current build has no article images and no article pages — please supply a lead image and full body copy for each of the nine articles, plus author name and publication date.			
ACTION / NOTE Article 4 is dated (“Stablecoin Regulation in 2025”). Recommend re-titling to keep it current.			

Closing call to action

Full-width band before the contact section.

C-15	Reassurance note	We respond to all enquiries within one business day. Your information is treated in strict confidence.	

REF	ELEMENT	CONTENT AS CURRENTLY BUILT	CLIENT REVISIONS
	ACTION / NOTE	Client instruction from the brief: "Contact us page to be inspired by FIS but a little different. The left-side content from the CTA form to be added to a drop-down." — this restructure has not yet been applied. As briefed, the five contact routes on the left would collapse into a single dropdown selector within the form.	
	ACTION / NOTE	Client instruction from the brief: "Floating CTA of contact should route to form where the user needs to fill all the information. WhatsApp to be removed." — Confirmed: there is no WhatsApp button in the current build. There is also no floating contact button yet; if one is wanted it should scroll directly to this form.	
	ACTION / NOTE	Form submissions currently have no destination. Please confirm the inbox that should receive enquiries and whether a CRM or auto-responder is required.	

Open items & what we need from you

Every outstanding decision and missing asset in one place, drawn from the review above and from the original brief. Items marked High are on the critical path to launch.

PAGE	OPEN ITEM	WHAT WE NEED	OWNER	PRIORITY
Global	Service naming is inconsistent between the Services dropdown menu and the Services page cards.	Confirm one master list of service names.	Client	HIGH
Global	"Contact" appears twice in the header (button + Career link both route to Contact).	Confirm final navigation; the brief asks for a single Contact entry.	Client	HIGH
Global	Privacy Policy, Terms of Use and Disclaimer pages are not written.	Supply approved legal copy.	Client / Legal	HIGH
Global	LinkedIn and X/Twitter links are placeholders.	Supply live profile URLs.	Client	MEDIUM
Page 3	Platform diagram to remain a static image (per brief).	Confirmed — no action.	Noted	CLOSED
Page 4	Industry cards use emoji icons rather than brand icons.	Approve a custom icon set.	Design	MEDIUM
Page 5	OrbisMoneta Lab is a placeholder — no imagery, no detail.	Supply images plus 3–5 prototype/research themes with short descriptions.	Client	HIGH
Page 6	No partner logos placed; "Become a OrbisMoneta partner" needs a grammar fix.	Supply approved logos and permissions; approve "Become an OrbisMoneta partner."	Client	MEDIUM
Page 7	Co-founder and additional leadership profiles outstanding.	Supply name, role, photograph and ≈ 90-word biography for each.	Client	HIGH
Page 7	Leadership photographs missing — cards show initials.	Supply professional headshots.	Client	HIGH
Page 7	Careers page to be added under About (per brief).	Supply employer positioning, cultural principles, open roles and application route.	Client	HIGH

PAGE	OPEN ITEM	WHAT WE NEED	OWNER	PRIORITY
Page 8	Nine article headlines exist but no article pages, body copy or images.	Supply full copy, lead image, author and date per article — or confirm a phased publishing plan.	Client	HIGH
Page 8	"Stablecoin Regulation in 2025" will read as dated.	Approve a re-titled version.	Client	LOW
Page 9	Contact restructure per the FIS-inspired brief (left-side routes into a dropdown) not yet applied.	Confirm the intended layout before build.	Client	HIGH
Page 9	WhatsApp button — confirmed absent from the build.	No action.	Noted	CLOSED
Page 9	Enquiry form has no submission destination.	Confirm receiving inbox, CRM and auto-responder requirements.	Client	HIGH
